

How Qwikkit Put all the Pieces in Place with Yooz

Industry: Manufacturing/Construction

Location: Houston, Texas, USA

Invoices: 500/month

ERP: MS Dynamics 365 Business Central

Website: www.qwikkit.com

Founded in 2017, Qwikkit delivers innovative solutions for apartment cabinet renovations, making the process faster, simpler, and far more affordable. The company is backed by over 30 years of executive experience in kitchen cabinet design and installation, producing over 4 million custom parts and completing renovations in more than 50,000 homes. Qwikkit's commitment to customer needs, advanced door technology, automation, and cost efficiency ensure precision at every stage from ordering to production to invoicing. Guided by core values such as customer success, team care, integrity, continuous improvement, growth, and fun, Qwikkit upholds the highest standards of safety, quality, timely delivery, and cost savings across its manufacturing operations.

"Yooz has simplified our process and given us control. We're processing invoices faster, making fewer mistakes, and the whole team is happier with how things run."

Adam Franklin, Director of Accounting and Finance

Previous Pain Points

Paper invoice and manual data entry

No platform scalability

Limited visibility and tracking

Manual matching of invoices, POs, and receipts

Slow approvals creating payment delays

The Yooz Solution

Multi-channel electronic invoice scanning with AI-powered data extraction and validation.

Scalable, **flexible workflows** with unlimited users and locations.

Full visibility with **audit-ready traceability** that simplifies reporting and speeds financial close.

Automatic matching for accuracy and fewer errors **seamlessly integrated** with Microsoft Dynamics 365 Business Central.

Customizable multi-level approval workflows to route invoices correctly, accelerate payments, and control spend

✕ The Challenge

Before adopting Yooz, Qwikkit's accounts payable process was fully manual. Invoices were entered by hand, approvals were managed via email or paper, and visibility into document status was limited. Tracking invoices and ensuring timely payments was a constant challenge. Adam Franklin, Qwikkit's Director of Accounting and Finance, explained *"The team was spending too much time just trying to figure out where an invoice was in the process."* As the company grew, these inefficiencies became more pronounced, leading to delays, duplicate entries, and overall frustration. It was clear that Qwikkit needed a faster, more transparent, and automated solution to streamline operations and reduce manual workload.

✓ The Solution

Qwikkit sought an AP automation solution that integrated seamlessly with their ERP, Microsoft Dynamics 365 Business Central, and simplified invoice processing. Adam said, *"We chose Yooz because it connected seamlessly with Business Central and didn't require us to change our accounting process."* Furthermore, Yooz's intuitive interface and powerful automation capabilities immediately set it apart from other options. Adam also highlighted the support from the Yooz team: *"From day one, the Yooz team made us feel supported. They took the time to understand our needs, and that made a huge difference."* The combination of technology and personalized service gave Qwikkit confidence that Yooz was the right choice.

The implementation process was straightforward and efficient. Yooz guided Qwikkit every step of the way, ensuring the AP team quickly became comfortable with the new system. Adam reflected, *"It was one of those rare software rollouts that just worked. The transition was easy, and we didn't experience any disruption in our workflow."* Clear, concise training sessions allowed the team to start processing invoices through Yooz within weeks. The collaborative approach and responsive support made the experience stress-free and helped Qwikkit realize the full value of their new AP system immediately.

"Don't wait to automate. Once you see how much time and stress it saves your team, you'll wish you had done it sooner. Yooz makes it simple and the results speak for themselves."

Adam Franklin, Director of Accounting and Finance

The Impact

Since implementing Yooz, Qwikkit has seen significant improvements in efficiency, accuracy, and visibility. Manual data entry has been eliminated. Approvals move faster, and the entire process is fully tracked within Business Central. Adam shared, *"We went from chasing paper and emails to having everything organized in one place."* He continued, *"Yooz has simplified our process and given us control. We're processing invoices faster, making fewer mistakes, and the whole team is happier with how things run."* Automation has freed the team to focus on more strategic tasks while improving workflow and morale.
